## FEATURES

Gross Weight:	<b>22.000 kg</b>
Height (with packaging):	<b>24.000 cm</b>
Length (with packaging):	<b>105.000 cm</b>
Width (with packaging):	<b>40.000 cm</b>

## DESCRIPTION

*Technical specifications: Length: - 103cm, Width - 38cm, Thickness/Height - 11cm, Weight - 19.6kg (9.8kg per ramp). Maximum recommended working height - 155mm. Maximum loading of 7500kg (per pair) These container loading ramps are made of high-quality aluminum, ensuring durability and solid construction. Measuring 1.03 meter in length, makes them ideal for loading and unloading goods into containers with small height differences. Surface features a ribbed, anti-slip design that provides enhanced traction for safe use. WORHAN brand is visibly marked on the side, along with certification details, indicating compliance with safety standards. The ramps are designed to comply with EN ISO 12100 safety regulations, has CE certification, ensuring reliability and high standards. The loading lip at the end of the ramp features a curved and grooved design for better grip and secure placement on container edges and are ideal for handling heavy loads such as trolleys, pallet jacks, forklift trucks or any other machinery Overall, these aluminum container ramps are a practical and reliable solution for loading tasks, combining safety and durability.*
